4 Stretch Goals	6 To do	2 In progress	5 Done
Display team profile page from database rather than static HTML. Will require creating a new model. Added by royceschultz	Create readme. Link to live website. Added by royceschultz	[Royce] BUG: Persistent search. Signing up for an event clears the search fields. Added by royceschultz	[Ishan] Sticky Footer. Footer should be at the bottom. The div containing block content in base.html should automatically stretch to fill the screen. Added by royceschultz
Stretch Goal: Filter events by start/end date rather than boolean past Added by royceschultz	Message alerts when signing up for events or following users should include a hyperlink to the event or user. Added by royceschultz	[Chace] Project Domain Name Added by royceschultz	[Ishan] In events.html, 'users attending' button should include the number of users. The number of users in the line above can be removed. Added by royceschultz
Stretch Goal: Allow users to comment on events Added by royceschultz	Paginate Events Added by royceschultz		[Bradley] Sort events by • number of users signed up • Event Date (ascending, descending) Added by royceschultz
Stretch Goal: Sort events by number of followed users signed up Added by royceschultz	Create dummy users and events for presentation Added by royceschultz		[Manuel] On the profile page, following and followers need modals. There is also an issue with a missing div end tag causing the footer to be rendered incorrectly. Added by royceschultz
	Time is stored in UTC (universal time), but the browser will render time in timezones. Figure out how timezones work. Added by royceschultz		
	Choose file button on edit profile form needs crispy styling Added by royceschultz		

Development

Platform
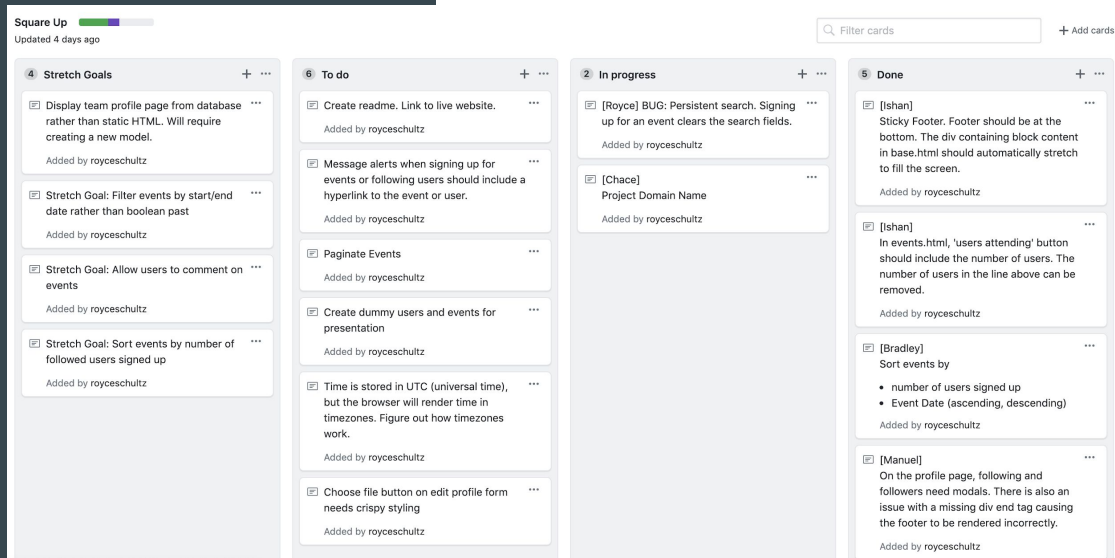

Django

```
        </fieldset>
        <div class="form-group">
          <button class="btn btn-outline-dark">Search</button>
        </div>

        {% include "widgets/sortOptions.html" %}
      </form>
      {%for event in events%}
        {% include 'event.html' with event=event %}
      {%endfor%}

{% endblock content%}
```

Deployment

Deployment Environment

Amazon web services

-EC2 instance accessed through ssh

-Virtual server pulls github deployment branch

-Nginx

-Gunicorn

-Supervisor

Commit History

*Chace's commits to the AWS deployment

branch are not included
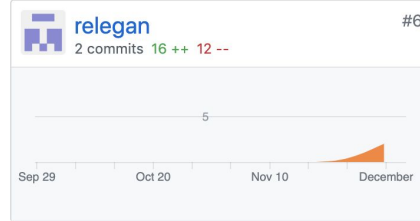

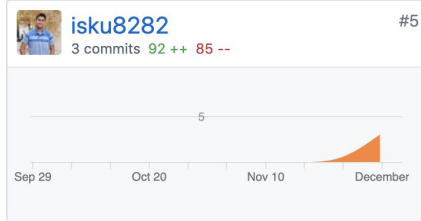

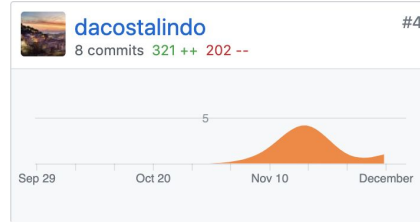

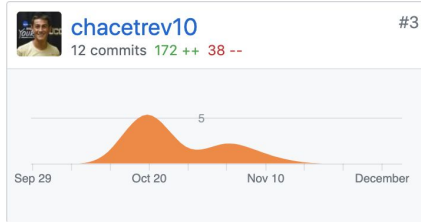

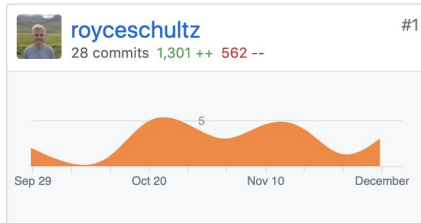

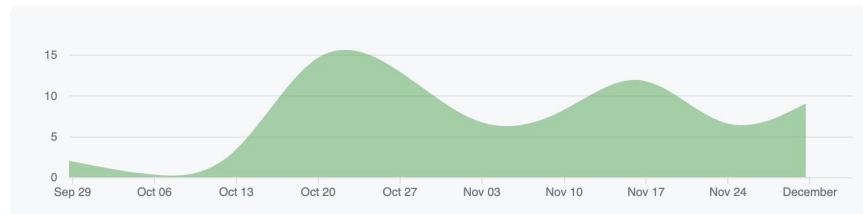

Challenges

- Familiarity of the technologies
- Couldn't accomplish all the goals
- Direction of the website

Demo
